# webpack

webpack.js.org

Direct Entry Program

What is webpack?

At its core, webpack is a static module bundler for modern JavaScript applications. When webpack processes your application, it internally builds a dependency graph which maps every module your project needs and generates one or more bundles. -webpack doc-

The webpack is an open-source JavaScript module bundler. It is made primarily for JavaScript, but it can transform front-end assets such as HTML, CSS, and images too. -wikipedia-

bundle your assets

MODULES WITH DEPENDENCIES

STATIC ASSETS

Direct Entry Program

Okay I get this,
but hey! why do I need something like this?

Basic Concepts of webpack

- Entry
- Output
- Loaders
- Plugins
- Mode

Now you know the basics

It is time to play 😉
